- c) The agency's report shall be approved by the agency head and made readily available to the public through its website or, if it does not have one, through other means.

The Sacramento County Main Jail continues to modify and improve the way it handles PREA education, complaints and investigations. During 2016, RCCC underwent a full PREA Compliance audit by a certified Auditor. As a result, many changes were made to policies and procedures to further improve the way sexual assaults are detected and investigated.

During 2017, the Main Jail hired two additional Compliance Unit Officers to assist with the implementation of PREA related policies and procedures. Compliance Unit Officers completed updated PREA training to ensure that best practices for PREA investigations and record keeping are maintained.

In 2017, there were a total of 29 reports filed by inmates at the Main Jail complaining of sexual abuse that fall within the scope of PREA, as detailed below:

Per PREA §115.5 definitions of dispositions are:

- *Substantiated allegation*: means an allegation that was investigated and determined to have occurred.
- *Unsubstantiated allegation*: means an allegation that was investigated and the investigation produced insufficient evidence to make a final determination as to whether or not the event occurred.
- *Unfounded allegation*: means an allegation that was investigated and determined not to have occurred.

In comparison to last year's data, there was a decrease in reports meeting the criteria set forth by PREA. In 2016 there were thirty-four reports of sexual abuse at the Main Jail meeting the criteria set forth by PREA compared to twenty-nine in 2017. Of the twenty-nine cases reported one was reported to staff as having occurred outside the facility. Of the remaining twenty-eight, two were substantiated and referred for prosecution, three were unfounded and twenty-two were unsubstantiated. There is one case in which the investigation is ongoing. In 2016, there were nineteen reports of sexual assault at the Main Jail facility. In 2017, the number of reported sexual assaults decreased to seven. In 2017, the number of sexual battery reports increased to eighteen, up from eleven in 2016. The increase in reporting can be attributed to several factors including increased inmate PREA education and awareness.

After reviewing all reports, it is concluded that all cases were investigated properly and in accordance with the Sacramento County Sheriff's Department's policy and the PREA rule.

**Note:** To ensure the safety and security of this facility information identifying victims or suspects and specific locations within the facility has been redacted from this report (PREA Standard 115.88(d)).
